

FRONTEND DEVELOPER (Software Developer)

Name: Ganesh Sahu

Contact: +91-6370533527

Email: ganisahu2001@gmail.com

LinkedIn: [linkedin.com/in/ganesh-sahu-28699a227](https://www.linkedin.com/in/ganesh-sahu-28699a227)

Professional Summary :

- Dynamic and detail-oriented UI Developer with 2 years of experience in designing and developing user-friendly, responsive web applications.
- Proficient in modern web technologies: HTML5, CSS3, TypeScript, Angular, Angular Material, Core Java, Advanced Java, JDBC, Servlet, and Bootstrap. Demonstrated ability to collaborate effectively with cross-functional teams to deliver high-quality projects within deadlines.
- Known for creating reusable components, optimizing performance, and enhancing user experiences through innovative UI/UX designs.
- Adept at mentoring junior developers and actively contributing to agile development practices.
- Familiar with modern UI libraries, including **React**, **React Query**, and experienced in working with Angular-based enterprise systems.
- Good experience developing web applications and web design using Angular, Bootstrap, HTML, CSS, and Angular Material.
- Extensive experience in developing salary slip details, including salary components, salary templates, salary template assignments, salary generation, and payslip download.
- Integrated RESTful APIs to fetch and display data like POST, GET, PUT, and DELETE, enhancing application functionality and user engagement. And also worked in Third-party API calling

SKILLSET :

Front-End Technologies: Angular, TypeScript, HTML5, JavaScript, API integration, RxJS, Debugging Unit Testing (Karma, Jasmine), React, React concept, React Hooks, State Management

Styling Frameworks: Bootstrap, Angular Material, SASS/SCSS, CSS3

Build & Package Management: Webpack, Angular CLI, npm

Version Control: Git, GitHub

Databases : Oracle(MySQL)

Responsive Design: Mobile-first design, Flexbox, CSS Grid

Tools: VS Code, Postman, Swagger

Development Practices: Code Refactoring, Clean Code, Code Review

Soft Skills: Problem-solving, Team collaboration, Communication

PROFESSIONAL EXPERIENCE :

Front-End Developer

Nighwan Technologies Private Limited

September 2023 – Present (2 years)

- **Project Development:** Spearheaded the development of several high-visibility projects using Angular, React, and TypeScript, resulting in improved user engagement and satisfaction. Led the front-end development efforts for the company's flagship product, which saw a 30% increase in user retention.
- **UI/UX Collaboration:** Worked closely with UX/UI designers to translate design mockups into functional user interfaces. Actively participated in design reviews and provided feedback to ensure designs were both aesthetically pleasing and technically feasible.
- **Component Creation:** Developed reusable and modular Angular components, React components, and services, which decreased development time for new features by 25%. Created a custom component library using Angular Material to standardize UI elements across multiple projects.
- Developed and maintained dynamic and responsive web applications using Angular and React.

PROJECTS :

1. Human Resource Management System (HRMS)

Organization: Nighwan Technologies

Duration: Sep 2023 – Present

Team Size: 11

Role: Frontend Developer

Description:

Developed a comprehensive **HRMS platform** to manage employee lifecycle operations, including attendance, payroll, leave, and performance management.

Key Contributions:

- Built dynamic UI using **Angular and Angular Material**
- Developed modules for **attendance, payroll, salary templates, payslip generation**, and leave management
- Automated **salary calculations** and integrated tax & benefits APIs
- Implemented **role-based access control**
- Integrated REST APIs for seamless backend communication
- Conducted functional testing and bug fixing
- Followed Agile methodology for incremental delivery
- Participated in Agile practices to deliver features incrementally.
- Coding and functional testing of the enhancements/bugs.
- Implemented centralized **HTTP Interceptors** for:
 - Auth token injection
 - Global error handling
 - API loader management

2. E-Commerce Web Application (Angular + REST API)

Role: Frontend Developer

Description:

Designed and developed a **responsive E-Commerce web application** that allows users to browse products, manage cart items, place orders, and track order history.

Responsibilities & Achievements:

- Developed **product listing, product detail, cart, and checkout pages** using **Angular**
- Implemented **category-wise product filtering, search functionality, and sorting**
- Integrated **RESTful APIs** to fetch products, manage cart, and place orders
- Implemented **user authentication and authorization** (login/signup)
- Built **reactive forms** for address and payment details with validation
- Optimized application performance using **lazy loading and reusable components**
- Ensured **mobile-first responsive design** using Angular Material & CSS
- Handled API error states and loaders for a better user experience
- Optimized performance using:
 - Lazy loading
 - Image optimization
 - Change detection strategy

Responsibilities & Achievements:

Angular, TypeScript, HTML5, CSS3, Angular Material, REST APIs, RxJS

EDUCATIONAL QUALIFICATION :

- Bachelor of Computer Application(BCA) from Berhampur University, Berhampur, Odisha. (2021)
- Master of Computer Application(MCA) from BPUT, Bhubaneswar, Odisha. (2023)

DECLARATION:

I declare that all the above statements are true to the best of my knowledge.

Date: 24/12/2025
