SUMMARY

Passionate Software Engineer with 1 year of experience building fast, responsive, and SEO-friendly web applications using **React.js**, **Next.js**, and **TypeScript**.

EDUCATION

Bachelor of Technology, Kamla Nehru Institute of Technology, Sultanpur
Electronics Engineering. **8.16 CGPA (Hons)**

2020 - 2024

SKILLS

Technical Skills	HTML5, CSS3, Javascript, Material UI, React.js, Typescript, Syncfusion , PdfTron
Soft Skills	Communication, Negotiation, Teamwork, Adaptability, Time Management
Tools	VS Code, Postman, Github, Oracle SQL Plus, MySQL

EXPERIENCE

Software Engineer

Dec 2024 – Present

Apollo Computers, Okhla NSIC, New Delhi

Contributed to the development of two major applications:

- A collaborative data management platform with AI-powered features, where I worked on the frontend using **React.js**, **Material-UI**, and **Redux**. Optimized component structuring improved application load speed by **75%** and reduced user interaction latency by **80%**. Collaborated with backend and design teams to integrate APIs and ensure a seamless, scalable user experience.
- A digital workflow automation system (E-Office) for inter-department file sharing and approvals. Developed features such as digital signing (DAK), noting history with complete file rotation tracking, and internal/external document sharing. These enhancements ensured **100%** transparency in approvals, reduced time-to-approval by **70%**, and improved inter-department efficiency in collaboration with **back-end** and QA teams.

Software Developer

June 2024 – Dec 2024

CakeLaya, Noida, Uttar Pradesh

Contributed to building and enhancing the startup's web application with a focus on frontend development using **HTML**, **CSS**, **JavaScript**, and **React.js**. Implemented features such as online cake ordering and Stripe payment gateway integration, streamlining the purchase process. The platform successfully processed **1,500+** customer orders and generated **Rs.1,00,000+** in revenue, driving nearly **80%** growth in online sales within the first few months. Strengthened expertise in front-end technologies, payment integrations, and delivering business-driven solutions in a fast-paced startup environment.

PROJECTS

EZEmployee

[Github Link](#)

Developed a full-stack employee registration and login system using **React.js** with function-based components and a local JSON backend. Implemented complete **CRUD** operations, **routing**, and user validation using **React hooks** and **props**. Built a responsive interface for employee data handling, with seamless navigation and **data integrity**.

VisionBoard

[Github Link](#)

Implemented role-based access control for **admin** task assignment and employee task tracking. Built a real-time task dashboard in **React.js** for dynamic status and progress updates. Utilized **React hooks** for efficient state management across task assignment and tracking components.
