CAREER SUMMARY

Android Developer | 6+ Years Experience | Kotlin | Jetpack Compose | Coroutines | Core Java | Android studio | Native | Flutter | Github Copilot | Generative AI | Immediate Joiner Highly skilled Android Developer And experience equipped with great coding, debugging, and project management abilities. Accomplishes project goals consistently with elegant, scalable code. As an Android Developer transitioning to Flutter with strong understanding of State Management, REST API & Clean Architecture

Wrote clean, maintainable, and well-documented Kotlin code following MVVM and SOLID principles to improve app scalability and readability.

EDUCATION

- SIKKIM MANIPAL UNIVERSITY 2012 - 2015
BCA
- PROFESSIONAL CERTIFICATION 2015 - 2016
Core Java+Android
Form Ducat
- SENIOR SECONDARY (CLASS 2010 - 2012
12TH) — U.P BOARD
- CERTIFICATE 2025 - 2025
Generative AI- [Link](#)
Github Copilot- [Link](#)

TOOLS & SKILLS

- Android Studio, & SDK
- Dependency Injection
- POS , CI/CD, Github
- JSON, Volley, REST API
- Google Maps, Place Api
- Clean Architecture
- Firebase Crashlytics
- Network Connectivity
- Support & Troubleshooting
- Client Handling

WORK EXPERIENCE

12th July 2023
2nd July 2025

• **PRAGYA SOLUTIONS FOR SUSTAINABLE DEVELOPMENT PVT. LTD.**

Sr. Android developer/
Sr. Team Member

Tech Stack : Android studio, Kotlin, Jetpack compose, Retrofit, Volley, JSON parsing, shared preferences. PHP, CSS, Cpanel, Core FTP CSV, MySQL.

- [View Release Apk>>](#)
- **Optimized** government data systems through cPanel, MySQL, and large-scale CSV data processing.
- Strong knowledge of OOPs concepts applied in building scalable Java & Android applications, improving code reusability and maintainability by 30%.
- Experience with Gradle, Android Studio, and Java-based build tools for app development and deployment, reducing build time by 25%.
- **Hands-on expertise** in migrating legacy Android UI from XML to Jetpack Compose for faster development and better maintainability.
- **Redesigned** web portals using PHP and CSS, improving performance and usability by 30%.

-

- **KAFF** – Built in Java with Android components, and Compatible with multiple devices for seamless operation.
- **Leveraged** the Firebase platform to implement firebase Crashlytics for App cresing errors.

- **Engineered** a custom camera module using Core java and Android CameraX library, integrated with lifecycle-aware components for high-quality image capture and seamless performance.
- **Track Sales:** Enables users to record daily item sales, generate invoices, and analyze sales trends to support informed business decisions and improve overall sales performance.
- **Attendance Management:** Facilitated employee attendance tracking via camera-based capture or manual entry, improving accuracy by 40% and enabling detailed reporting for effective workforce monitoring.
- **Handled** customer queries via phone, chat, and email, improving first-response resolution rate by 40%.
- **Architected** a Sales Tracking module using Java and Android libraries, enabling users to record daily item sales, generate invoices, and analyze sales trends to support informed business decisions and improve performance.
- **Feature for product searches:** Easily locate electronic items by name, category, brand, or specifications. And Use filters to refine results (e.g., price, availability, or product type).
- **Created** a sales staff application enabling engagement with trade partners and online market, allowing real-time tracking of Sales Support Representatives (SSRs) at retail counters and improving field monitoring efficiency by 30%.
- **Additionally**, the tool tracks sales performance, competition sales data, and Mentored the team attendance, and branding and display initiatives.
- **Constructed** a custom calendar module to display user attendance on a daily basis within the calendar view, improving user engagement by 25%
- **Established** effective communication strategies, resulting in a 40% improvement in customer satisfaction ratings.

4th Nov 2019 • **SIGUIENTE SOFTWARES PRIVATE LIMITED** *Android developer*

21st Nov 2021

Tech Stack : Android studio & SDK, Java, XML Layouts, Retrofit, Volley, JSON parsing, shared preferences.

- **Optimized** the application's performance by implementing caching and using memory-efficient data structures.
- **Innovated** a Volley-based API enabling seamless integration with third-party services
- Android SDK, Core Java, Broadcast Receiver, Shared Preference , Json Parse, Volley, Progress Dialog, API Hit from the server , Intents, Notification. Paytm Payment Getaway.
- Built an Android app 'Car Booking' for ride reservations, enhancing booking efficiency by 15%
- **Built** a Book selling App - The application allows users to upload their own books for sale and purchase books listed by other users.
- **Implemented** a custom calendar module to display user attendance on a daily basis within the calendar view..

2nd Dec 2016 • **APPROUTES SERVICE PVT. LTD.** *Android developer Trainee*

8th Jul 2017

During my training, I learned how to implement Android applications using different libraries and dependencies. I also gained hands-on experience in setting up and working with the Android development environment (Android Studio, Eclipse ide, Gradle, and SDK tools). This helped me understand how to integrate APIs, manage dependencies, and work with real-time Android app features effectively.
