

Anju Sasi

9605010874 - iOS Developer - as.anjusasi@gmail.com - www.linkedin.com/in/anju-sasi-882999164 - <https://github.com/Anju-Prasanth>

SUMMARY

iOS Developer with 6+ years of experience building and maintaining production-grade iOS applications using Swift and UIKit. Strong expertise in MVVM architecture, REST API integration, Firebase services, real-time socket communication, and location-based applications. Experienced across the full app lifecycle from requirement analysis to App Store deployment.

TECHNICAL SKILLS

Programming Languages: Swift, Objective-C

Frameworks & Libraries: UIKit, MVVM Architecture & Design Patterns, Google Maps SDK, Dependency Injection, Alamofire, Firebase, Crashlytics, ObjectMapper, Kingfisher, MBProgressHUD, SVGKit, WWCalendarTimeSelector

iOS Concepts & Integrations: RESTful APIs, Push Notifications, Core Location, Core Data, Biometric Authentication, JSON Parsing, Offline Features, RealmDB, Background Tasks, Social Login (Facebook, Google), Payment Gateway Integration, Chat & Socket-based Live Updates, In-App Purchases (IAP), URLSession

IDE & Tools: Xcode, Git, GitHub, Postman

Dependency Management: Swift package Manager, Cocoapods, Carthage

App Store & Testing: App Store Connect, TestFlight, Unit Testing

WORK EXPERIENCE

iOS Developer

AppsTeam Technologies , 15H, Transasia Cyberpark Infopark Phase - II, Kochi

May 2021 - Dec 2025

- Developed and maintained multiple production-level iOS applications using Swift and MVVM architecture.
- Integrated RESTful APIs, Firebase services, push notifications, and third-party SDKs. Collaborated with crossfunctional teams to deliver high-quality, scalable applications.
- Improved app performance, UI responsiveness, and crash stability using Crashlytics .Worked on location tracking, map integration, and socket-based live data updates

iOS Developer

Infintor Solutions , 9th Floor, Vismaya Infopark, Infopark Campus, Kochi

Oct 2019 - Apr 2021

- Built feature-rich iOS applications with Core Location, Core Data, and third-party libraries .
- Participated in full app lifecycle from requirement analysis to App Store deployment.
- Implemented user authentication, payment gateway integration, and real-time updates.

iOS Developer

Websight Technologies , Parangot, Vadakkenada Road, Muttambalam, Kottayam, Kerala

Aug 2018 - Sep 2019

- Developed reusable UI components and optimized app workflows .
- Worked closely with backend teams for API integration and bug fixing.

PROJECTS

- **Niya Treat**, Online food and hospitality application enabling room booking, door delivery, party orders, table reservations, and takeaway services.
- **Safari**, E-commerce mobile application offering shopping for groceries, home appliances, electronics, and daily essentials.
- **Lasagu**, Educational application providing daily study materials, PSC-related news, general knowledge, current affairs, memory techniques, and mock tests.

- **Outing App**, Online booking application for yachts, cars, and helicopters with live location tracking, pickup, and drop services.
- **HelpMe App**, Safety-focused application designed to assist guardians of lost children, individuals with special needs (including dementia), and domestic animals through tracking and rescue coordination.
- **Girfalco**, Vehicle tracking and management system offering real-time location updates, downloadable reports, and advanced filtering by vehicle type and number.
- **Express Home Service**, Service management application enabling sales personnel to prioritize appointments and complete service workflows using Measure Square integration.
- **Driver App**, Route-based operational application used for collection services, enabling drivers to follow assigned routes, track live vehicle movement, with Google Maps and monitor completed, missed, and deviated collection points in real time.

KEY ACHIEVEMENTS

- Delivered and maintained multiple production-grade iOS applications using Swift and MVVM architecture across domains such as e-commerce, safety, logistics, and booking platforms.
- Acted as a technical lead for multiple projects, owning feature design, implementation, and release coordination.
- Trained and mentored junior iOS developers on Swift, UIKit, MVVM architecture, and project coding standards.
- Improved application performance and crash stability by optimizing API calls, memory usage, and UI rendering, monitored using Firebase Crashlytics.
- Implemented real-time features including live location tracking, socket-based updates, and Firebase push notification.
- Reviewed code, resolved complex technical issues, and ensured adherence to best practices and clean architecture.
- Collaborated closely with backend, QA, and product teams to deliver scalable, high-quality applications within timelines.
- Successfully handled App Store submissions, TestFlight builds, and post-release production support.

EDUCATION

Anna University, Chennai <i>M.E - VLSI Design</i>	VCEW
Mahatma Gandhi University <i>B.Tech - AEI</i>	SJCET, Palai, Kottayam
