Profile

iOS Developer with 4 years of experience building scalable, high-performance applications using Swift. Experienced in clean architecture design, RESTful API integration, and secure payment/banking solutions. Strong expertise in SQL Server optimization, performance tuning, and debugging. Proficient in modern Swift practices and Git, delivering reliable, maintainable, and production-ready applications.

Technical Skills

- **Languages & Frameworks:** Swift, UIKit, SwiftUI, CoreData, AVFoundation
- **CocoaTouch:** AutoLayout, Gesture, Push Notifications, Background Modes
- **Database:** SQL Server, CoreData
- **APIs & Services:** REST, JSON, URLSession, Alamofire, Payment Gateways (Razorpay)
- **Testing:** XCTest, XCUITest
- **Tools:** Xcode, Visual Studio, Git, GitHub
- **Development Practices:** MVC, MVVM, VIPER, Agile (Scrum), Code Reviews, Continuous Integration, Banking Domain Knowledge

Professional Experience

Spainik Technology

October 2024 – 16 February 2026

iOS Developer

Faridabad, Haryana, India

Design, develop, and maintain enterprise-grade applications using Swift. Implement RESTful APIs and payment gateways for secure financial transactions in iOS apps. Optimize local data handling using CoreData and caching. Develop background tasks, push notifications, and smooth in-app communication. Collaborate with teams to deliver scalable, high-quality iOS solutions while maintaining clean code with Xcode.

MobisoftLabs

May 2022 – April 2024

iOS Developer

Gurgaon, Haryana, India

Built and maintained iOS applications using Swift, UIKit/SwiftUI, integrating payment gateways for banking features. Engaged in architectural planning sessions to improve modularity, extensibility, and banking security compliance.

Pace Wisdom Solution Pvt. Ltd

Internship (3 Months)

Software Developer Intern

Bengaluru, Karnataka, India

Gained hands-on experience with PHP development, SQL Server, and basic payment processing systems. Collaborated on refining project requirements and adopting best practices within the development team.

Projects

Non-Stop Video Cam

Developed a real-time camera processing application using Swift and AVFoundation. Implemented continuous live video capture with dynamic tattoo overlay effects while maintaining smooth performance. Optimized frame handling to prevent lag and ensured responsive UI using UIKit. Technologies: Swift, UIKit, AVFoundation.

Banking Dashboard (iOS Application)

Developed a secure banking dashboard using Swift and MVVM architecture in Xcode. Integrated RESTful APIs to fetch real-time account summaries, transaction data, and analytics information. Implemented JSON parsing using Codable and presented data using UITableView and dashboard components while ensuring secure communication over HTTPS. Technologies: Swift, UIKit, MVVM, URLSession, CoreData.
