## ANDROID DEVELOPER

I am a skilled Android Developer with a proven track record in delivering high-quality mobile applications. I excel in leading development projects, improving team performance, and building strong relationships with stakeholders. My expertise lies in creating user-friendly apps that enhance user satisfaction and meet business goals.

---

## STRENGTHS AND EXPERTISE

### Technical Skills

- ✓ Proficient in Java and Kotlin, with hands-on experience in Android Studio, Android SDK, and RESTful APIs
- ✓ Strong command of MVVM architecture, Git, Firebase, and libraries like Retrofit and Glide
- ✓ Basic knowledge of Flutter & Dart for developing cross-platform mobile applications

### Soft Skills

Leadership, Event Management, Public Speaking, Effective planner, Analytical and Problem- Solving Skills.

---

## PROFESSIONAL EXPERIENCE

### Protolabz eServices

September 2022 - Present

#### Android Developer

- Developed and maintained high-quality Android applications using Java and Kotlin, enhancing user experience and app performance.
- Led the design and implementation of key features, including UI components, RESTful API integration, and database management with Room and SQLite.
- Utilized Android Architecture Components (ViewModel, LiveData) and followed MVVM architecture to create scalable and maintainable code.
- Improved app responsiveness and stability by integrating third-party libraries such as Retrofit for network calls, Glide for image loading, and Firebase for analytics and crash reporting.
- Conducted code reviews, wrote unit tests with JUnit and ensured code quality and best practices.
- Utilized GitHub for version control, code collaboration, and project management.

---

## PROJECTS

### • Igor: Your Ultimate Car Parking Booking App

Igor is your new mobility assistant designed to give you more time by simplifying the parking process. With Igor, you can park faster and smarter, eliminating setbacks and saving valuable time. Enjoy a seamless and secure parking experience, free from the usual hassles. Igor ensures smart mobility, allowing you to focus on what matters most.

- **ThroneRide**

ThroneRide is a comprehensive car booking app similar to Ola, designed for seamless and efficient ride-hailing. Users can easily book rides, track drivers in real-time, and make secure payments, ensuring a smooth and convenient transportation experience.

- **ThroneRide Driver**

ThroneRide Driver is a dedicated app for drivers, enabling them to manage ride requests, navigate routes, and communicate with passengers effortlessly. The app provides real-time updates, trip history, and earnings tracking, ensuring drivers have all the tools needed for a productive and efficient driving experience.

**More projects can be found on my GitHub profile.**

## **PERSONAL PROJECTS**

- **Punjabi boliyan**

I developed an app featuring a collection of Punjabi Boliyan, which are traditional songs sung during weddings. The app offers a curated list of Boliyan for various wedding ceremonies, allowing users to easily access and enjoy these cultural songs.
