

PROFESSIONAL SUMMARY

- With almost 2 years of experience in iOS Application Development, I have worked on building user-friendly and scalable mobile applications using Swift, UIKit, Auto Layout, Storyboards, and RESTful APIs. Writing clean and well-organized code to ensure smooth performance and reliable user experiences.
- I have experience implementing MVC and MVVM architecture patterns, integrating backend APIs, and handling real-time data updates. I am comfortable developing dynamic UI components and ensuring the app runs efficiently without performance issues.
- I work well in agile team environments, collaborating with designers and backend developers to deliver quality applications on time. I am committed to building applications that meet business requirements and provide a positive experience for users.

TECHNICAL SKILLS

- **Programming Languages** : Swift, Swift UI, Python.
- **Development Tools** : Xcode, Interface Builder, Simulator, Postman, CocoaPods.
- **iOS Technologies** : Swift, UIKit, MVC Architecture, MVVM Architecture, RESTful APIs Integration, URLSession, JSON Parsing (Codable), Auto Layout, UITableView/UICollectionview, UIScrollView, Push Notifications.
- **Operating Systems** : MacOS , Windows, Linux.
- **Databases** : SQLite , MySQL.

PROFESSIONAL EXPERIENCE

Role: iOS Front-End Developer

PROJECTS:

Connectly (Cross Timezone Scheduler – CTS)

Nov 2025 – Present

- Built cross-timezone availability matching logic to display overlapping time slots.
- Developed the iOS front-end using Swift for a global scheduling application.
- Implemented secure email registration with OTP verification and JWT-based authentication.
- Designed and developed Dashboard, Group Management, Availability, and Settings modules.
- Integrated RESTful APIs using URLSession for real-time data updates.
- Implemented push notifications for invites and schedule changes.
- Used Core Data for local caching to improve performance and reduce API calls.
- Ensured accurate timezone conversion and smooth UI updates.
- Collaborated closely with backend developers to align API contracts and data models.

Leave Management System (LMS)

Sept 2025 – Nov 2025

- Developed Login, Dashboard, Leave Request, Leave Balance, and Approval workflow screens.
- Integrated secure REST APIs for authentication and leave tracking.
- Implemented strong input validation and secure password handling.
- Optimized data handling for improved app responsiveness and reliability.
- Ensured smooth navigation and seamless screen transitions.
- Improved user experience through clean UI and structured layout design.

Project Management System (PMS)

Jan 2025 – Sept 2025

- Built responsive UI screens including Login, Registration, Password Recovery, and Dashboard.
- Implemented dynamic data display using UITableView and UICollectionView.
- Integrated backend APIs for project tracking and task management.
- Developed secure authentication flows with proper validation mechanisms.
- Optimized performance through efficient data parsing and state management.
- Ensured smooth transitions and consistent cross-device compatibility.

Iaimax Coin (IMC Coin)

Sept 2024 – Jan 2025

- Contributed to iOS front-end development of a fintech cryptocurrency application
- Developed Login, Registration, Password Recovery, and Referral modules using Auto Layout
- Integrated RESTful APIs for dynamic country code and user data fetching.
- Implemented secure authentication and validation mechanisms
- Used Xcode Instruments and debugging tools to identify and fix performance bottlenecks.
- Collaborated with backend teams during early pre-sale and development stages.

WORK EXPERIENCE

SP Software Private Limited.

July 2024 – Present

Availability : Notice period 1month.

EDUCATION

Institute/College	Course	Duration	Percentage/CGPA
Methodist college Engineering and technology	ECE	2017-21	6.30
Sri gayatri junior college	MPC	2015-17	70.5%
Maharishi vidya Niketan school	SSC	2014-15	6.7
