LANGUAGES

- English
- Hindi

- backend engineers, and UX teams to deliver a seamless learning experience.
- Led technical design reviews, provided solutions to complex problems, and guided decision-making across multiple teams.
 - Mentored junior developers through code reviews, technical sessions, and knowledge-sharing workshops, improving team capability.
 - Ensured compliance with Apple and Android design principles and interface guidelines, maintaining performance and user experience at scale.
 - Optimised the code logic, architecture, user experience, loading, responsiveness, and processing time.
 - Successfully published the mobile application across both iOS and Android platforms, demonstrating proficiency in cross-platform development frameworks and end-to-end app deployment processes.

Sep 2015 - Aug 2024

CTO & Sr. IOS App Developer

Kooky Info media Pvt ltd

- Spearheaded end-to-end mobile app architecture and delivery, from requirement gathering to App Store deployment.
- Acted as SME for iOS technologies, making critical architectural and framework decisions (Objective-C, Swift).
- Integrated RESTful APIs, Core Data, SQLite, and third-party services to enhance functionality.
- Implemented crash analytics, in-app purchases, ads/monetization, and advanced features like chat modules, animations, and push notifications.
- Mentored and managed developers, ensuring adherence to best practices in design, coding, and testing.
- Partnered with cross-functional teams (design, QA, product management) to align technology with business strategy.

Sep 2013 - Aug 2015

Jr. IOS App Developer

Unanimous Technologies Pvt Ltd (Mithra Media)

- Developed eCommerce, Social networking app, Navigation app, dating app in Objective-C, ensuring compatibility with evolving iOS versions.
- Supported system design interpretation and requirement analysis, contributing to successful app launches.
- Gained early experience in ads integration, monetization, and campaign strategies to boost app visibility.

Projects

122 Days

Prodio

This application is an audio learning app allows users to

complete your PD courses on phone or tablet during otherwise unproductive time - commuting, travelling, exercising or during outdoor activities.
My responsibility here was to develop the code as per design requirement, work on bug fix, maintenance support and training the junior. Mainly used architecture is MVVM.

- Front-end: Swift, Database: MySQL
