PROFESSIONAL SUMMARY

iOS App Developer with 1.5 years of hands-on experience building and shipping consumer mobile applications using Swift and SwiftUI. Skilled in developing image-processing and utility apps, integrating Firebase for backend services, and implementing app localization for multi-region release. Strong foundation in OOP, data structures, and SQL, with a track record of delivering polished, App Store-ready features on time.

TECHNICAL SKILLS

Languages: Swift, Java, Python

iOS Development: SwiftUI, UIKit, MVVM, Firebase (Auth, Firestore, Analytics, Crashlytics), App Localization & Internationalization, App Store Deployment

Databases: MySQL, Firebase Firestore

Web Basics: HTML, CSS, JavaScript

Concepts: OOP (Inheritance, Polymorphism, Encapsulation, Abstraction), Exception Handling, Multithreading, Collections, SQL (DDL/DML/TCL, Joins, Constraints, Aggregate Functions)

WORK EXPERIENCE

iOS App Developer | Pixel Force Private Limited, Bengaluru

Jun 2025 – Present

- Work as part of the iOS development team building and maintaining native applications using Swift and SwiftUI, from design handoff through App Store release.
- Team member on Picstun, a photo editing utility app, contributing UI components and image-processing workflows in SwiftUI.
- Team member on Munimji, contributing to core screens and business logic, and integrating Firebase (Authentication, Firestore, Analytics) for user data and event tracking.
- Team member on RemoveObj, an AI-assisted object removal app, contributing to image import/export pipelines and on-device processing UI in Swift.
- Team member on PhotoToCartoon, contributing to the image transformation UI, result gallery, and sharing functionality.
- Contributed to app localization and internationalization across multiple apps to support release in additional regions/languages.
- Used Firebase Crashlytics and Analytics to help monitor app stability and user behavior, assisting in resolving crashes and improving retention.
- Collaborated with designers, backend engineers, and fellow iOS developers in an agile environment, participating in code reviews and sprint planning.

KEY PROJECTS

Picstun

- Photo editing app built with SwiftUI featuring filters, cropping, and export tools; worked as part of the team, contributing to Firebase integration for user accounts and analytics.

Munimji

- Business/utility app with Firebase-backed data sync and localization support; contributed to the SwiftUI interface as part of the development team.

RemoveObj

- AI-powered object removal app; contributed to image selection, processing, and before/after comparison screens in Swift as a team member.

PhotoToCartoon

- Converts user photos into cartoon-style images; contributed to the SwiftUI transformation flow and result-sharing feature as part of the team.

EDUCATION

Bachelor of Engineering – Electronics and Communication Engineering	2020 – 2024
Intermediate (MPC)	2018 – 2020
SSC	2017 – 2018
