Location: Pune, India

PROFESSIONAL SUMMARY

Frontend / Angular Developer with 2+ years of hands-on experience including 6 months of internship and 1.5+ years of full-time professional experience, specializing in building responsive, scalable, and high-performance web applications using Angular 16/17, TypeScript, JavaScript, HTML5, and CSS3.

Proven ability to develop reusable components, implement Angular routing, reactive forms, and REST API integration, and optimize application performance using lazy loading and code splitting, resulting in faster load times and improved user experience.

Experienced in working within Agile/Scrum teams, collaborating with backend, QA, and design teams to deliver production-ready UI solutions used by real end users.

TECHNICAL SKILLS

Frontend Technologies: Angular 16/17, TypeScript, JavaScript (ES6+), RxJS
Web Technologies: HTML5, CSS3, Bootstrap, Tailwind CSS
Architecture & Concepts: Component-Based Architecture, Lazy Loading, Reusable Components, Responsive Design
Tools & Platforms: Git, GitHub, VS Code, Postman, Chrome DevTools
API & Backend (Basic): RESTful APIs, SQL
Database (Basic): MySQL

EXPERIENCE

Frontend Developer
Openfuture Technologies Pvt. Ltd. | Sep 2024 - Present

- Developed and maintained responsive web applications using Angular 16/17, HTML5, CSS3, and JavaScript.
- Implemented REST API integration and collaborated with backend teams for smooth data flow.
- Built reusable components following component-based architecture.
- Optimized application performance using lazy loading, image optimization, and code splitting.
- Ensured cross-browser compatibility and responsive UI across devices.
- Participated in Agile/Scrum ceremonies and collaborated with QA and product teams.
- Used Git and GitHub for version control and code collaboration.

Frontend Developer Intern

Jan 2024 – Aug 2024

- Built responsive web pages using HTML5 and CSS3, following modern layout and styling practices.
- Implemented JavaScript-based form validation and basic DOM manipulation.
- Converted UI designs into structured and responsive HTML/CSS layouts.
- Identified and resolved UI issues related to spacing, alignment, and responsiveness.
- Performed cross-browser testing to ensure consistent UI behavior.
- Followed coding standards and participated in guided development tasks.

PROJECTS

TechNova Solution - Official Company Website | Angular Project

Nov 2024 – Apr 2025

- Developed a responsive corporate website using Angular 16/17 to showcase company services, portfolio, leadership team, and career opportunities.
 - Implemented component-based architecture to ensure scalability, maintainability, and reusable code.
 - Created modern, mobile-friendly UI with CSS3, Angular Animations, transitions, and hover effects to enhance user experience.
 - Collaborated with UI/UX designers to convert wireframes and prototypes into pixel-perfect frontend interfaces.
 - Developed Careers module with job listings and application forms using Angular Reactive Forms and validations.
 - Implemented lazy loading, image optimization, and browser caching to improve website performance and load time.
 - Ensured cross-browser compatibility and responsive design across desktop, tablet, and mobile devices.
 - Used Git and GitHub for version control and worked in Agile/Scrum development environment with cross-functional teams.
- Technologies Used:
- Angular 16/17, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, Angular Animations, REST APIs, Git, GitHub

Employee Management Dashboard | Angular Project

Timeline - June 2025 – Oct 2025

- Developed a responsive Employee Management Dashboard for HR teams to manage employee data, leaves, and performance.
 - Designed dashboard layouts to display employee statistics, performance metrics, and leave status.
 - Implemented CRUD operations (Create, Read, Update, Delete) for employee records using REST APIs.
 - Built interactive data tables with sorting, filtering, and pagination for efficient data management.
 - Integrated charts and graphs to visualize employee performance metrics.
 - Ensured responsive and mobile-friendly UI across devices and browsers.
 - Optimized frontend performance using lazy loading and component-based architecture.
 - Collaborated with backend developers to ensure smooth REST API integration and data flow.
 - Used Git for version control and followed Agile/Scrum development methodology.
- Technologies Used:
- Angular 16/17, TypeScript, JavaScript (ES6+), HTML5, CSS3, Bootstrap, REST APIs, Git

EDUCATION SUMMARY

Bachelor of Engineering (BE)

Prof Ram Meghe College of Engineering and Management, Amravati University.

RESPONSIBILITIES

Actively contributed to real-time Angular projects used by end users

Improved UI performance and responsiveness across devices

Collaborated with backend, QA, and design teams

CERTIFICATION

Full stack Development Certification - Profound Edutech, Pune

Duration: 6 Months

- Completed a 6-month intensive training program focused on HTML, CSS, JavaScript, Angular, and modern frontend development practices.
 - Developed multiple real-time mini projects, including responsive web pages, dynamic UI components, and API-integrated modules.
 - Successfully earned the course completion certificate recognizing practical skills and project-based learning.
-
