ABOUT ME

Senior Android Engineer with 10+ years of experience in building high-performance, scalable mobile apps using Kotlin, Coroutines, MVVM, and Dagger. Specialized in IoT, BLE integrations, and Clean Architecture. Known for solving complex problems, optimizing app performance, and enhancing user experiences.

SKILLS

- Android
- Kotlin
- Java
- IoT
- BLE
- Coroutine
- Dagger 2
- Dagger-Hilt
- MVVM
- ViewModels
- MVVM Clean Architecture
- Room Database
- Jetpack Compose
- Kotlin Flow

EDUCATION

Bachelor of Engineering: Computer Science & Technology

Govt. Engineering Collage Rajkot
(2007 - 2011)

EXPERIENCE

SENIOR SOFTWARE ENGINEER

Present (2017)

Vision Group Inc

- Working on IoT related technological issues for assigned projects, increasing customer satisfaction ratings.
- Provided technical support using knowledge of complex technology to solve problems and support new projects.
- Adjusted design parameters to incorporate new features.
- Collaborated with fellow engineers to evaluate software and hardware interfaces.
- Developed clear specifications for project plans using customer requirements.
- Analyzed data to coordinate the installation of new systems or the modification of existing systems.
- Updated old code bases to modern development standards, improving functionality.

SENIOR SOFTWARE ENGINEER

(2012 - 2016)

SJM Technologies Pvt Ltd

- Trained and mentored junior developers and engineers, teaching skills in mobile application development and working to improve overall team performance.
- Worked with project managers, developers, quality assurance, and customers to resolve technical issues. Reviewed project specifications and designed technology solutions that met or exceeded performance expectations.
- Worked with software development and testing team members to design and develop robust solutions to meet client requirements for functionality, scalability, and performance

JUNIOR SOFTWARE ENGINEER

(2011 - 2012)

WebDesk Solution Pvt Ltd

- Collaborated with the team to analyze system solutions based on client requirements.
- Manipulated and implemented object-oriented programming models. Analyzed code defects and failures and presented code refactors and design fixes.
- Devised software with modules for report generation.
