COMPUTER SCIENCE AND ENGINEERING STUDENT

Final-year BTech CSE student and Mobile Application Developer with hands-on experience in building real-world mobile applications using Flutter. Skilled in role-based systems, REST API integration, SQL queries and real-time features like geolocation and tracking. Passionate about problem-solving and user-centric development.

KEY COMPETENCIES

- ◆ Pressure Performer
- ◆ Rapid Learner
- ◆ Self Starter
- ◆ Teamwork Maestro
- ◆ Organizational Skills

TECHNICAL SKILLS

- ◆ Flutter
- ◆ Rest API's
- ◆ Firebase
- ◆ SQL

EDUCATION

AMRITSAR GROUP OF COLLEGES

2022-Present

Bachelor of Technology in Computer Science and Engineering

CGPA (till 6th Sem) - 8.26/10

SSSS KHALSA SENIOR SECONDARY SCHOOL

2021-2022

Senior Secondary

Percentage - 90.8%

AJIT VIDIALAY SENIOR SECONDARY SCHOOL

2019-2020

Matriculation

Percentage - 100.0%

PROFESSIONAL EXPERIENCE

◆ Mobile Application Developer – Jalandhar

Jan 2026 - Present

- Developed and maintained real-world mobile applications using Flutter.
 - Built scalable apps with GetX state management and API integrations.
 - Worked on multi-role systems, CRM modules, and real-time features.
 - Collaborated with backend teams for API integration and smooth data flow.
 - Optimized app performance by improving state management and reducing API calls.
-

PROJECTS

- **Smart Pukhraj App (Ayurvedic CRM + E-commerce)**
 - Developed a role-based application (Branch, Staff, Customer) using Flutter, GetX & PHP backend.
 - Implemented CRM system with daily visit tracking and diet plan management.
 - Built analytics dashboards (monthly performance, top planners).
 - Integrated e-commerce features: cart, QR-based payments, order tracking.
 - Connected with web-based admin panel for full system control.
 - **UK-Based Pharma Delivery App (Ongoing)**
 - Developing a location-based delivery app using Google Maps & Geolocation.
 - Implementing postcode-based navigation (UK).
 - Features include live tracking, route optimization, and delivery management.
 - **Crown Cellars (Inventory Management System)**
 - Built an inventory management app for a liquor brand.
 - Managed stock tracking, order flow, and business operations digitally.
 - **CareConnect (Healthcare App)**
 - Developed a real-time appointment and queue management system.
 - Features include patient records, analytics, and smart scheduling.
 - **Blood Donation App**
 - Built donor-recipient matching system using Flutter & Firebase.
 - Implemented real-time request handling.
-

EXTRACURRICULAR ACTIVITIES

- Participated in various coding and debugging contests (GeeksForGeeks).
- Winner of Creative Writing (Department of CSE).
- Winner of Public Speaking contest (Department of Applied Sciences).
- Winner of Mock Campus Placement (Students' Library Committee).
