PROFILE
Creative UX/UI Designer passionate about applying behavioral psychology, UX research, and interaction design to design intuitive, accessible digital experiences that solve real user problems and encourage meaningful user engagement.

- PROJECTS**
- Social Understanding for Neurodivergent Individuals**
End-to-End UX Case Study | Product Design | Mobile App
 - Designed an end-to-end learning platform for neurodivergent individuals by combining UX research, behavioral psychology, and interaction design to make social concepts easier to understand and apply in everyday situations.
 - Structured user flows, interaction models, and information architecture to reduce cognitive load, making complex social learning more intuitive and accessible.
 - Integrated AI-assisted guidance, contextual support tools, and reflection workflows to help users apply social skills beyond structured lessons and into everyday interactions.
- Rethinking How We Learn a Language**
End-to-End UX Case Study | Product Design | Mobile App
 - Designed a language learning experience to reduce learning friction, improve lesson continuity, and encourage long-term learner engagement.
 - Defined intuitive navigation and lesson progression patterns to minimize learning interruptions and support consistent skill development.
 - Implemented habit-building mechanisms including challenges, streaks, progress visualization, and social features to reinforce learning habits and sustain learner engagement.
