EDUCATION

2018 - 2022 Amritsar
Group of Colleges, Amritsar

- Bachelor of Technology
- CGPA: 8.4

2017 - 2018
St.Soldier Elite Convent , Amritsar

- Senior Secondary
- CGPA: 6.0

SKILLS

PHP

Laravel

NodeJs

Express js

JavaScript

Mongo DB

GitHub

Mysql

SMTP

Redux

Codeigniter

React

Jquery

Redis

Backend development

Payment Integration

Third party Integration

LANGUAGES

- English
- Hindi

PROFILE SUMMARY

I am proficient in working independently on features, requiring minimal guidance to deliver robust solutions. My experience extends to working with ERP solutions and collaborating with some of the biggest companies, such as DVC, CAHO, ASDC, MYBIS etc. My track record reflects a commitment to excellence and a passion for innovation in the software development industry.

WORK EXPERIENCE

Interactive Bees Pvt Ltd 
Software Developer

2023 - Present

- Led R&D initiatives to build scalable Laravel applications, integrating chatbot functionalities and global engagement features.
- Ensured application scalability through performance optimization, real-time monitoring, server security enhancements, and implementing high-availability configurations for business-critical systems.
- Implemented strong security measures, including encrypted backups, regulatory compliance, and multi-layered access controls to prevent unauthorized system or data access.
- Designed and developed content management systems with role-based access control (RBAC), ensuring seamless collaboration, scalability, and maintainability across distributed teams.

Maxtra
Technologies 

Laravel Developer

2022 - 2023

- Understand client requirements and deliver custom Laravel solutions, independently estimating efforts while aligning outputs with specific business objectives and goals.
- Develop robust Laravel applications by building routing systems, middleware, authentication mechanisms, and efficient data workflows, while integrating external APIs to ensure seamless backend operations and long-term scalability.

Laravel & React

ROLE AND RESPONSIBILITIES

- **Code Development:** Wrote efficient, reusable, and testable code for scalable applications, enhancing overall system performance and maintainability.
- **Business Analysis & Implementation:** Analyzed and implemented business needs and feature modification requests, converting them into robust software components and solutions.
- **Frontend Development:** Developed and optimized frontend components to improve performance and responsiveness, including client-side logic and highly responsive web applications.
- **Application Integration:** Integrated user-oriented elements into various applications, ensuring seamless interaction with data storage solutions and backend systems.
- **High Availability & Security:** Designed and implemented high availability and low latency applications, incorporating data protection and security features to safeguard against vulnerabilities.
- **Performance Tuning & Automation:** Tuned application performance and automated processes to enhance efficiency and reduce manual intervention.
- **Testing & Debugging:** Utilized Laravel testing tools like PHPUnit for thorough testing and debugging of web applications, ensuring high code quality and application reliability.
- **System Enhancement:** Enhanced functionalities of existing software systems to meet evolving user needs and improve system capabilities.
- **Technology Trends:** Stayed up-to-date with the latest technology trends and advancements to incorporate cutting-edge solutions into development practices.
- **Team Leadership:** Led development teams, providing guidance on architectural decisions, enforcing best practices, and ensuring project milestones were met.
- **Project Efficiency:** Reduced project delivery time by 30% through the implementation of an optimized milestone process, improving overall project management and delivery speed.
- **Performance Monitoring & Security:** Implemented performance monitoring, security measures, and patches to maintain optimal system health.
- **Backup Encryption & Server Maintenance:** Managed backup encryption and server maintenance to ensure data integrity and system reliability.
- **Content Strategy & SEO:** Integrated content strategy and SEO best practices into development to enhance visibility and user engagement.
- **Load & Performance Testing:** Conducted load and performance testing to ensure the robustness and scalability of applications.
-
