OBJECTIVE

I am a Junior Software Developer with hands-on experience in building and maintaining web applications using modern technologies such as React, TypeScript, Node.js, and PostgreSQL. I excel in debugging and API integration, always striving to improve and contribute to production-level projects. I am seeking a role that allows me to grow my skills while making an impact on real-world applications

PROFESSIONAL EXPERIENCE

Digisquares Technologies Private Limited

Junior Software Developer

April 2025 - Present

A technology company focused on developing web applications and IT services

- Developed and maintained live web applications using React and TypeScript
- Integrated backend services and REST APIs using Node.js and Express.js
- Worked with PostgreSQL (pg) for data handling and CRUD operations
- Contributed to the Digisquares company website (digisquares.com)
- Worked on the Aura garments management system (aura.digisquares.com)
- Implemented UI components, form validations, and business logic
- Debugged and resolved frontend and backend issues in production
- Created technical documentation using Markdown
