

ENDELA MANOJ

 [+91-9963220525](tel:+91-9963220525) |  MANOJSREE9963@GMAIL.COM  HYDERABAD, INDIA

PROFESSIONAL SUMMARY

- Over **5 years 2 months** of IT experience in analysis, design, development, testing, and implementation of iOS applications using **Swift**.
- Successfully developed and launched **6 iOS apps** on the Apple App Store: **Volta, MyInstallr-Client, MyInstallr-Contractor, Skill Ontario, Study Tap, and Indie Town**.
- Proficient in the **full development lifecycle** using Agile methodology, following best practices in **Cocoa, Swift, SwiftUI, Combine, and UIKit**.
- Strong understanding of **OOP, Memory Management, MVC, MVVM, and Dependency Injection**.

Hands-on experience with **Test-Driven Development (TDD)** and writing **Unit Test cases** using XCTest.

- Good knowledge of **Persistent Data**, Data Structures, and performance profiling/tuning.
- Extensive experience in **app distribution**, provisioning, certificates, App Store submission, and **enterprise app distribution (OTA)** on the Apple Developer Portal.
- Proven ability to **lead teams** in onsite/offshore models while collaborating with QA, Business Analysts, and development teams.
- Strong communication skills with a consistent record of delivering high-quality iOS applications.

TECHNICAL SKILLS

- **Xcode, Swift, GIT, UIKit, SwiftUI, Combine, MVVM, MVC, URLSession, Alamofire, Postman, CoreData, CoreGraphics, Graphs, CoreLocation, MapKit (Apple), Google Maps, Stripe, Razorpay, PushNotifications, ChatUIFramework, CocoaPods, JIRA, Vulnerabilities, PWN / Pen-testing basics.**

PROFESSIONAL EXPERIENCE

Company	Duration	Designation
YOUR VOLTA	12//2024 - current	Senior IOS Developer
COFORGE	03/2024 - 10/2024	Senior IOS Developer
ZZAZ	03/2023 - 03/2024	IOS Developer
KAUTECH	02/2021- 06/2023	iOS Developer

ROLES AND RESPONSIBILITIES

- Understanding the requirements and scope of the application.
- UI Designing and complete application flow.

-
- Participated in the low-level coding of the application.
 - Collaborated with backend teams to integrate RESTful APIs.
 - Involved in Code Reviews.
 - Involved in the deployment process.
 - Involved in bug fixing and resolving.
 - Functionality testing by giving various inputs.
 - Adding unit test cases
 - Integrated third-party APIs and services

PROJECT DETAILS

Project 1: Volta

Role: Senior developer.

Project Overview: Volta Ride App — a platform to book Autos, Bike-Taxis, and Cars with integrated maps, live location sharing, and secure payment systems to enhance the ride-booking experience.

Key Responsibilities:

- Developed and maintained core ride-booking features using **SwiftUI**, supporting Autos, Bike-Taxis, and Cars.
- Implemented push notifications for ride status updates, such as booking, driver arrival, and trip start/end.
- Integrated **RESTful APIs** to fetch driver details, ride history, fare breakdown, and real-time location data.
- Followed **MVVM** architecture to ensure clean code separation and better testability.

Project 2: TriNet HR Platform (Trinet)

Role: Senior iOS Developer

Project Overview: The TriNet HR App offers comprehensive HR solutions, enabling businesses to save time, support employees with HR services, and receive expert HR guidance for growth.

Key Responsibilities:

- Enhanced development workflows by adopting **Agile methodologies** and industry best practices.
- Delivered the project with improved performance and notably fewer bugs through thorough testing.
- Built and maintained applications using the latest iOS technologies to ensure **scalability** and **ease of maintenance**.

Project 3: MyInstaller

Role: Senior iOS Developer

Project Overview: MyInstaller serves as a bridge between clients and contractors, offering a seamless platform for efficient collaboration. Clients can easily request and schedule installations, while contractors benefit from streamlined job management tools — creating a hassle-free experience for both sides in the installation industry.

Key Responsibilities:

-
- Developed **custom UI designs and features** from the ground up, ensuring a personalized and user-centric experience.
 - Implemented **creative and scalable solutions** to meet diverse project requirements, enhancing app uniqueness and usability.
 - Led the **UI design process**, creating visually appealing and intuitive interfaces to improve user engagement.
 - Successfully **integrated external APIs** to expand functionality and enable connectivity with third-party services.
 - Developed **photo upload and management** features for contractors and clients, optimizing image handling and performance.
 - Ensured **secure and efficient data processing**, including encryption measures to safeguard sensitive financial information.
 - Designed and implemented **payment modules** supporting seamless and secure in-app transactions.

Project 4: UpdateMe

Role: Senior iOS Developer

Project Overview: UpdateMe is a **location-based dating and social networking app** that leverages geolocation to enable real-time, natural connections. Users can set their status, check in at popular venues (such as bars, clubs, restaurants, events, beaches, and gyms), and instantly discover and connect with others nearby using personalized filters.

Key Responsibilities:

- Developed features that allow users to **set and update their status** dynamically within the app.
- Implemented a **check-in system** enabling users to share their current location and view others checked in at nearby venues.
- Built **custom filters** for users to sort and view profiles based on age, interests, and relationship preferences.
- Enhanced user experience by integrating **directions and location details** for checked-in venues.
- Implemented **push notifications** to boost engagement through real-time updates on matches, messages, and events.
- Optimized app performance and responsiveness, ensuring smooth operation for **real-time updates** and **location-based services**.

DECLARATION

I hereby declare that the above-written particulars are true to the best of my knowledge and belief.
