
SUMMARY

To Work for an organization where I can aspire to reach my fullest potential using my creativity, energy, team spirit, multi-tasking abilities and cross – cultural diversity. I am seeking a company, which provides challenges and career potential.

EDUCATION:

- **Bachelor of Computer Application** | Indira Gandhi National Open University, Ghaziabad
Present
 - **Intermediate School** | Central Board of Secondary Education
2023
 - **High School** | Central Board of Secondary Education
2021
-

TECHNICAL SKILLS:

Bootstrap, CSS, JavaScript, HTML, UI/UX Design, Java, MYSQL, API, Logic, Interface building, spring Boot & REST API, OOPs concepts problem solving Git & Git Hub, DevOps Cloud tools and methodology, Software Testing (Understanding of software development, Testing techniques, Testing tools, Test planning & documentation)

AREA OF INTERESTS:

WEB App Development, Software Testing(Manual & Automation), Database Management System

PROJECTS:

Personal Portfolio Website

(Current Project)

HTML, CSS, JavaScript, Google Maps API

Developed and deployed a responsive personal portfolio website to showcase projects and professional background. Designed a clean and user-friendly UI using HTML, CSS, and vanilla JavaScript. Integrated Google Maps API to visually display current location. Implemented seamless page redirection for navigation between sections (About, Projects, Contact, etc.). Built a functional contact form with local storage support to retain user inputs for offline reference.

Student Grade Calculator

Java

Developed an console-based Java application that calculates a student's total marks, average percentage, and grade based on user input. The program accepts marks for multiple subjects, performs basic arithmetic and logical operations to determine the final grade, and displays results in a user-friendly format.

EXPERIENCE:

TRAINEE, FRESHER

As a Fresher aspiring to build a career in software development. I am seeking an internship opportunity as a Java Full Stack Developer. I have learned the fundamentals of Java programming database management and web technologies and I am eager to enhance my skills in Full Stack development. I am to work in a collaborative environment where I can learn from industry experts contribute to projects and strengthen my technical expertise.
