EXPERIENCE SUMMARY

Frontend Developer with 2 years and 6 months of professional experience in designing, developing, and maintaining scalable web applications using React.js and modern frontend technologies. Demonstrated expertise in building responsive, high-performance user interfaces with a strong focus on usability, code quality, and best practices. Experienced in translating business requirements into technical solutions, optimizing application performance, and ensuring cross-browser compatibility. Proven ability to collaborate effectively with cross-functional teams, contribute to agile development processes, and deliver reliable, high-quality products within defined timelines.

EDUCATIONAL QUALIFICATION

B.TECH – CIVIL ENGINEERING, CGPA: 5.52 – AUG 2021
G. Pulla Reddy Engineering College (Autonomous), Kurnool.

SKILL

- Hypertext Markup Language (HTML)
- Cascading Style Sheets (CSS)
- JavaScript
- ReactJS
- AngularJS
- Bootstrap
- Responsive Web Design
- Problem Solving & Debugging
- Material UI
- User Interface Development
- Component-Based Architecture
- GitHub

PROFESSIONAL EXPERIENCES

Company: YataYati Info Solutions Pvt Ltd
Designation: Junior Software Developer
Duration: June 12th, 2023 to Current
Project: Dentee

Developed a web-based Dentee-Clinic Management System to automate daily clinic operations such as patient appointment booking, medical record management, billing, and reporting. The system helps clinic staff manage patient data efficiently while reducing manual work. Built a responsive and intuitive user interface to ensure ease of use for doctors, receptionists, and administrators across devices. Implemented real-time data display and dashboards to provide instant visibility into appointments, patient history, and billing information. Worked closely with backend and QA teams to deliver a reliable, scalable solution that improves clinic workflow efficiency and overall patient experience.

ACHIEVEMENTS

- Successfully analyzed real-world clinic workflow challenges and translated them into a scalable web-based solution.
- Solved complex state management and data synchronization issues while handling appointments, patient records, and billing modules.
- Improved application performance by optimizing React component rendering and reducing unnecessary re-renders.
- Implemented responsive UI solutions to resolve cross-device compatibility issues, ensuring smooth usability on desktop, tablet, and mobile.
- Debugged and fixed critical UI and integration issues, enhancing system stability and reducing user-reported errors.
