sathishtamil2727@gmail.com

PROFESSIONAL SUMMARY

Detail-oriented **.NET Developer** with **1.3 years** of hands-on experience in designing, developing, and maintaining scalable web applications using C#, ASP.NET MVC, .NET Core, and SQL Server. Strong in backend development, REST API integration, database optimization, and MVC architecture. Experienced in banking and e-commerce domains. Seeking a growth-oriented development role.

CORE TECHNICAL SKILLS

- C# | ASP.NET | ASP.NET MVC | .NET Core | HTML5 | CSS3 | JavaScript | Bootstrap | SQL Server | MySQL | Visual Studio, VS Code | Git | GitHub | OOPs Concepts | RESTful APIs | MVC Architecture | CRUD Operations | Debugging & Unit Testing.

EDUCATION

- Bachelor of Arts – English | DR. M. G. R. Chokalingam Arts College, Irumbedu, Arni | 2017 – 2020

PROFESSIONAL EXPERIENCE

INTENSO TECH SOLUTION PRIVATE LIMITED

OCT 2024 – Present

.NET Developer

- Developed and maintained web applications using ASP.NET MVC, C#, and SQL Server following MVC architecture.
- Implemented backend business logic, validations, and exception handling for enterprise applications.
- Designed and optimized SQL queries, stored procedures, and database schemas for performance and scalability.
- Integrated RESTful APIs to enable communication with external systems and third-party services.
- Fixed production issues, improved application stability, and reduced recurring defects.
- Collaborated with QA, business analysts, and stakeholders to deliver high-quality releases.

PROJECTS

Omni-Channel Digital Commerce Platform | Digital banking

Aug 2025 – Present

- Developed backend modules supporting product catalog, cart, checkout, pricing, and order management using ASP.NET MVC.
- Implemented CRUD operations and optimized database interactions for faster response times.
- Integrated APIs for inventory management, order processing, and payment gateways.
- Supported scalable operations across web and mobile platforms during high-traffic periods.

Digital Banking & Core Banking Migration | Digital banking

NOV 2024 – July 2025

- Contributed to backend development during migration from legacy systems to Vault Core Banking platform.
- Implemented logic for customer onboarding, account management, deposits, withdrawals, and transaction posting.
- Ensured data integrity through validation, reconciliation, and error handling mechanisms.
- Supported compliance-ready and scalable banking workflows.

CERTIFICATION / TRAINING

.NET Developer Training

Hands-on training in C#, ASP.NET MVC, SQL Server, and real time projects
