Objective

Backend Developer with 1.5+ years of experience in web application development. Proficient in PHP, Laravel, Python, Django and MySQL. Skilled at leveraging AI tools and modern technologies to build scalable, efficient, and innovative solutions.

Relevant Coursework

- Api Development and integration
- Backend System Architecture
- Database Management
- Systems Programming
- Computer Architecture

Experience

IIG Technology

OCT 2024 – March 2026

Software Engineer

Bhubaneswar, Odisha

- Developed and maintained multiple enterprise web applications including HRMS, Hospital Management System, and Visitor Management System using PHP, Laravel, and MySQL.
- Designed and built RESTful APIs for secure frontend–backend communication across multiple projects.
- Implemented authentication, authorization, and Role-Based Access Control (RBAC) for multi-user systems.
- Built and customized a Centralized Admin Portal using Laravel 12 to manage content across multiple websites from a single dashboard.

Rixosys Pvt. Solution, Bhubaneswar

Jan 2024 – June 2024

Software Developer

Bhubaneswar, Odisha

- Assisted in the development of web-based applications using PHP and Laravel framework
- Gained hands-on experience in MVC architecture, database design, and REST API integration.
- Collaborated with senior developers to deliver production features on schedule.

Projects

Human Resource Management System | Php, Laravel, MySQL, RESTful APIs, RBAC, OOP

December 2025

- Designed and developed employee lifecycle management modules including payroll, attendance, and leave tracking.
- Implemented secure authentication and Role-Based Access Control to enforce access policies.
- Optimized database queries for performance at scale.
- Implemented automated attendance and leave tracking workflows to reduce manual processing.

Audio Book Management System | Php, Laravel 11, MySQL, OOP

January 2025

- Developed an admin dashboard to manage audio book categories, uploads, and user access.
- Implemented secure file upload/storage handling and designed a responsive UI using Bootstrap
- Designed and integrated user access controls and content management workflows for efficient audiobook organization and retrieval.

Hospital Management System | Python, Django, MySQL

March 2025

- Developed a hospital management system using Django with modules for patient registration, appointment scheduling, and billing.
- Implemented authentication and role-based access for doctors, staff, and administrators.
- Designed database models and handled backend logic using Django ORM.
