- Collaborated with cross-functional teams to implement features aligned with business requirements.

Intern at Mejona Technology LLP [↗](#)

June 2024- Aug 2024

Role - Web Developer

Bengaluru, Karnataka

- Learned and Implemented **Advanced Shopify Tools** like **Swipper, Pagination, Schema and Liquid**.
- Working on various projects using various coding methodologies.
- Tested and debugged interfaces to ensure cross-device compatibility and reliable functionality across browsers.
- Optimized page performance and ensured cross-browser and device compatibility for a seamless shopping experience.
- Handle the AppScript and created a responsive front-end using **HTML, CSS and JavaScript**.

PROJECTS

Finance Project Development W Frontend Developer—React JS, JavaScript, NPM

April 2025

- Developed and maintained banking web applications (both static and dynamic) with a focus on performance, scalability, and user experience.
- Built reusable and responsive UI components using React JS.
- Managed global application state efficiently using Redux Toolkit.
- Implemented form validations and business logic using JavaScript.
- Integrated backend services and handled data storage and retrieval using AWS.

Banking Project (Trade Finance Group) [↗](#) | **React.js, Redux Toolkit, Formik, JWT**

Jan 2025

- Developed a **banking web application** for trade finance operations, supporting deal creation, approvals, and tracking workflows.
- Implemented global state management using **Redux Toolkit** for efficient and predictable data handling.
- Added secure and accurate form validation using **Formik** to ensure correct user input.
- Integrated **REST APIs** for user authentication and loan/deal processing.

Netflix-GPT — AI-Powered [↗](#) | **React, JavaScript, Database - firebase, IDE - VS Code**

2024

- Developed a Netflix-inspired web application using React.js with Redux for efficient global state management.
- Designed a fully responsive and modern UI using Tailwind CSS, closely mimicking the Netflix user experience.
- Implemented Firebase Authentication for secure user sign-up and login, and used Firestore to store user data.

YouTube Clone—Video Streaming Platform [↗](#) | **HTML, CSS, Javascript, React**

2022-2023

- Developed a YouTube-like video streaming platform using React.js, Redux, and Tailwind CSS with a fully responsive UI.
- Implemented dynamic video listing, search functionality, and secure user authentication using Firebase.
- Used Firestore for data storage and deployed the application using Firebase Hosting.
