PROJECTS

React Native Mobile Application – Helping Hands Punjab

Developed a cross-platform NGO mobile app (Helping Hands Punjab) using React Native for iOS & Android to connect donors with people in need.

Implemented two main sections:

Campaigns – allows users to post cases and seek help.

Donors – enables individuals to contribute through donations.

Integrated secure PayPal payment gateway for online donations.

Built intuitive UI for campaign browsing, case posting, and donor registration.

Deployed successfully on both Google Play Store and Apple App Store

React js e-commerce ui

A modern and responsive e-commerce frontend application built using React JS. The project focuses on creating a clean user interface, reusable components.

GitHub Link: <https://github.com/CodeBySiya/react-ecommerce>

Laravel Projects

Integrated Google OAuth 2.0 Authentication – Implemented secure and seamless sign-in functionality using Google OAuth 2.0.

React + Laravel 12 CRUD Application – Designed and developed a resource management system with full Create, Read, Update, Delete capabilities. Leveraged React for UI.

Portfolio:

Designed and developed a portfolio website. Utilized HTML5, CSS3, and Bootstrap to create a responsive, mobile-friendly design optimized for various devices.

Full Stack Development Projects: Job Portal

Designed and developed a dynamic job portal inspired by popular platforms like Indeed, allowing employers to post jobs and job seekers to apply directly.

Implemented a credit-based posting system:

Employers purchase credits (points) to post jobs.

Each job posting deducts points from their balance.

Encourages efficient job posting management while generating revenue.

AngularJS with PHP

Built and integrated secure backend APIs in PHP with AngularJS frontend, ensuring smooth data exchange and performance.

Core PHP Applications

Designed and implemented dynamic feedback and admission forms, improving data collection efficiency for institutions.

WordPress E-commerce Website

Created a custom e-commerce platform for Tote Print Bags with logo customization and print-on-demand features.

I have work on the frontend of this site.
