

SOBIN T B

iOS Developer

About Me

Innovative and user-focused iOS Developer with 4 years of experience building sleek, high-performance applications. Brings 3 years of expertise in Objective-C, 2 years in Swift and SwiftUI, along with hands-on experience in Flutter, and strong proficiency in UIKit and modern Apple frameworks. Skilled in clean architecture, API integration, and third-party libraries, known for translating complex requirements into seamless mobile experiences, collaborating across teams, and delivering scalable, polished products — on time and with precision.

Skills:

Languages:

Objective - C

Swift

SwiftUI

Dart

Tools & Platforms:

● Xcode

● VS Code

● Cocoapod

● Firebase Console

● Postman

● GitHub

● Xcode Cloud

● Codemagic

Education:

Bachelor of Science

Kerala University

NSS College, Cherthala

2016 - 2019

+91 8281534349

Andhakaranazhy P.O, Cherthala,

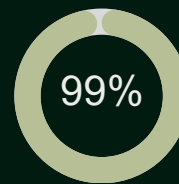

Alappuzha, Kerala

Language:

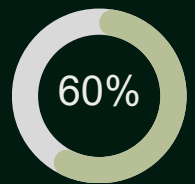

English

Malayalam

Tamil

Professional Experience:

Junior Software Engineer

October 2023 - March 2026 | Speridian Technologies.

- Spearheaded development of **“MyBank,”** a customizable iOS app for multiple clients, tailoring features and user flows to each business. **Led the full migration of MyBank to Swift**, playing a key role in the transition. Also managed **SesAuth**, an OTP gateway app for secure authentication in the BeaconPro portal using time-based OTPs.
- Crafted sleek, responsive UI using both **Storyboard and programmatic layouts**, blending design precision with code flexibility to deliver beautiful user experiences.
- Managed **CocoaPods & Swift Package Manager** dependencies, seamlessly **integrating Objective-C and Swift libraries** — ensuring smooth performance and scalability.
- Integrated **Google Firebase** for real-time **backend features** and **push notifications**, and incorporated **Google Maps SDK** for enhanced geolocation-based functionality.

- Also contributed to the development of “**TabBanking**”, a cross-platform **Flutter application** designed to streamline loan request processes for users and bank agents. Built with a scalable **MVVM architecture**, the app was tailored for multiple clients, enabling customizable workflows and consistent user experiences across platforms.

Associate Software Engineer

October 2022 - September 2023 | Sesame Software Solutions.

- Played a key role in designing and developing the **MyBank iOS app**, contributing to both UI and core functionality.
- Led seamless **API integrations**, ensuring robust communication between frontend and backend systems.
- Wrote clean, scalable **Objective-C code**, adhering to best practices and modern architectural standards.
- Managed the full spectrum of **Apple Developer operations**, including provisioning, **TestFlight**, **App Store releases**, and **developer program enrollment**.
- Collaborated closely with cross-functional teams, championing code reviews, knowledge sharing, and continuous improvement.

Internship

December 2021 - June 2022 | iROHUB Infotech.

- Developed **Big Fish**, an iOS app using **Swift 4**, focusing on performance, clean UI, and smooth user experience.
- Managed the UI using **Storyboard**, ensuring consistent design and responsive layout across devices.
- Integrated **RESTful APIs** to enable seamless data flow between the app’s frontend and backend services.

Projects:

My Bank (New)

Language : Swift
Interface : Storyboard, SwiftUI
Architecture : MVC, MVVM

Frameworks used :

- UIKit
- Combine
- CoreData
- SwiftUI
- URLSession
- LocalAuthentication

- WebKit
- CoreLocation
- Security
- Contacts
- Firebase
- FirebaseMessaging
- FreeRASP
- DTTJailbreak
- AVFoundation
- BackgroundTasks
- UserNotifications
- AddressBook
- GoogleMaps
- CashfreeSDK
- UserDefaults

My Bank (Old)

Language : Objective - C
Interface : Storyboard
Architecture : MVC

SesAuth

Language : Swift
Interface : Storyboard
Architecture : MVC

Frameworks used :

- UIKit
- URLSession
- UserDefaults
- CoreData
- LocalAuthentication
- iOSTOTP

Tab Banking(Flutter)

Language : Dart
Interface : Dart
Architecture : MVVC

Frameworks used :

- hive
- local_auth
- crypto
- camera
- google_ml_kit
- firebase_messaging
- riverpod
- dio
- flutter_secure_storage
- ssl_pinning_plugin
- shared_preferences
- geolocator
- flutter_local_notifications
