

Sushant Kumar

Senior Mobile Application Engineer | iOS (Swift/SwiftUI) & Flutter (Basic) | Cross-Platform & Scalable App Development

To leverage expertise in **iOS and cross-platform mobile development** to build **scalable, high-performance applications**, with a focus on **hybrid solutions and modern mobile architectures**.

+91-9716373334

sainisushant7@gmail.com

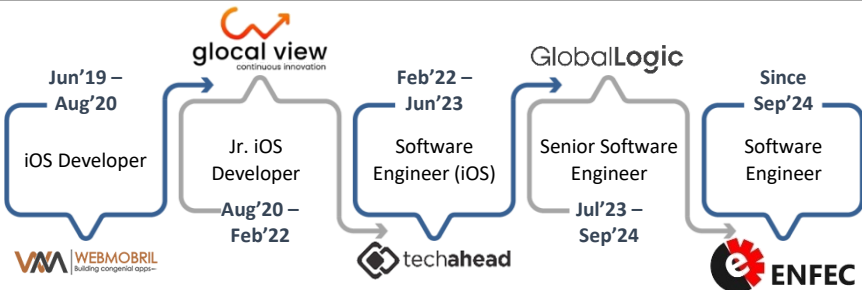

Noida

PROFILE SUMMARY

- Results-driven **Mobile Application Engineer** with **6+ years of experience** in **iOS and Cross-Platform Development**, specializing in building scalable, high-performance applications using **Swift, SwiftUI, and Flutter (Dart)** across consumer and enterprise environments.
- Proven expertise in **native iOS development and hybrid application engineering**, with recent hands-on experience in **Flutter**, enabling development of multi-platform, cost-efficient, and scalable mobile solutions.
- Strong command over **mobile architecture frameworks (MVVM, MVC, VIPER, BLoC Pattern)**, delivering modular, maintainable, and enterprise-grade applications aligned with modern engineering standards.
- Extensive experience in **end-to-end application lifecycle management**, including **solution design, development, integration, testing, deployment, and performance optimization**, ensuring high-quality releases and application stability.
- Advanced proficiency in integrating **third-party SDKs, APIs, and dependency managers (CocoaPods)** and implementing **real-time communication, geolocation services, payment gateway integrations, and cloud-backed solutions (Firebase)**.
- Demonstrated success in developing **feature-rich applications across domains** such as **mobility, e-commerce, logistics, staffing, and on-demand platforms**, driving user engagement and product scalability.
- Hands-on experience with **emerging technologies including ARKit and beacon-based solutions**, enabling development of innovative, context-aware and interactive mobile applications.
- Focus on **performance optimization, memory management, and responsiveness**, ensuring seamless user experiences across devices and operating environments.
- Proficient in **modern UI development (SwiftUI)** and leveraging **third-party libraries** to accelerate development cycles while maintaining high standards of **code quality, modularization, and automation**.
- Experience working in **agile, cross-functional teams**, contributing to rapid feature delivery, continuous integration, and adherence to **version control (Git) and best coding practices**.
- Exposure to **team collaboration and limited team management**, supporting knowledge sharing, coordination & efficient execution of development deliverables.
- Targeting opportunities in **Mobile Application Development (iOS/Flutter)** within **Delhi NCR (Noida/Gurgaon)**, with a strong preference for **hybrid and cross-platform development roles**.

CAREER TIMELINE

WORK EXPERIENCE

Enfec Solutions – Software Engineer | Hyderabad | Sep 2024 – Present | <https://enfec.com/>

- Designed and developed high-performance iOS and Flutter applications, improving app load speed.
- Enhanced application responsiveness and reduced crash rates through rigorous performance optimization and testing.
- Collaborated with cross-functional teams to define, design, and ship new features, increasing feature delivery efficiency.
- Maintained code quality, organization, and automated workflows, improving development efficiency.
- Successfully executed ad-hoc official tasks within deadlines, contributing to overall team productivity.

GlobalLogic – Senior Software Engineer | Noida | Jul 2023 – Sep 2024

- Developed cutting-edge iOS applications in SwiftUI, integrating advanced SDKs such as Sony Beacons and IppfSDKMap.

CORE COMPETENCIES

- iOS Application Development
- Cross-Platform Development (Flutter)
- Mobile Architecture (MVVM, MVC, VIPER, BLoC)
- API Integration & RESTful Services
- Third-Party SDK & Library Integration
- Firebase & Cloud Integration
- Payment Gateway Integration
- Real-Time Data & Communication Systems
- Performance Optimization & Memory Management
- ARKit & Beacon Technology
- Application Lifecycle Management
- Agile & Scrum Methodologies
- Code Quality & Automated Testing

TECHNICAL SKILLS

Swift	
SwiftUI	
Dart	
Xcode	
Git (Version Control)	
Object-Oriented Programming (OOP)	
Unit Testing	

- Managed dependencies using CocoaPods and third-party libraries, reducing build issues.
- Collaborated with team members to define, design, and deploy new features, improving feature rollout speed.
- Optimized app performance, resulting in faster app response times and lower memory usage.
- Implemented best practices in code organization and automation, enhancing maintainability.

TechAhead Software Pvt Ltd – Software Engineer (iOS) | Noida | Feb 2022 – Jun 2023

- Built iOS applications in Swift and SwiftUI, integrating libraries like Alamofire and Google Maps.
- Ensured app stability and responsiveness, reducing bug rates.
- Collaborated closely with the team to define, design, and deliver new features, improving deployment efficiency.
- Maintained high-quality, well-organized, and automated codebase, boosting development productivity.
- Optimized app performance for smooth user experience, increasing user engagement.

GlocalView Infotech Private Ltd – Jr. iOS Developer | Noida | Aug 2020 – Feb 2022

- Designed and developed iOS applications, ensuring high performance and responsiveness, improving app speed.
- Worked closely with the team to define, design, and ship features, accelerating feature delivery.
- Maintained code quality, organization, and automated testing, increasing code maintainability.
- Executed additional official tasks efficiently, contributing to overall project success.

Webmobril Technologies Private Ltd – iOS Developer | Noida | Jun 2019 – Aug 2020

- Independently and collaboratively developed iOS applications, improving task completion efficiency.
- Ensured app performance, quality, and responsiveness, reducing crash rates.
- Collaborated with team members to define, design, and deliver new features, improving overall project delivery speed.
- Maintained high-quality, organized, and automated code, enhancing workflow efficiency.
- Organized and prioritized work to meet deadlines, increasing on-time task completion.

ANNEXURE

- **T-Mobile Calling App | Duration:** September 2025 – Present | **Environment:** iOS (XCode, iOS SDK), Firebase, CocoaPods
Description: Currently developing a calling application for T-Mobile with enhanced communication features.
- **Nojima | Duration:** July 2023 – April 2024 | **Environment:** iOS (XCode 12+), AR, Sony Beacons | **URL:** <https://www.nojima.co.jp/>
Description: Developed a retail app for Japan-based electronics store chain. Features include AR-based shopping, QR code item registration, and direct purchase from the app.
- **Time2Staff | Environment:** XCode 12, iOS SDK 14, Firebase, CocoaPods, PayPal | **URL:** <https://apps.apple.com/in/app/time2staff/id1508370931>
Description: Staffing solution app to hire personnel efficiently with integrated payment support.
- **Voice of Norway | Environment:** XCode 12, iOS SDK 14, Firebase, CocoaPods, PayPal | **URL:** <https://apps.apple.com/in/app/voice-of-norway/id1274249263>
Description: Provides automatic audio guides for historical locations using geolocation.
- **Diamond Brows (User / Provider) | Environment:** XCode 11.3, iOS SDK 13, Firebase, CocoaPods, PayPal | **User URL:** <https://apps.apple.com/in/app/diamond-brows-user/id1543380380> | **Provider URL:** <https://apps.apple.com/in/app/diamond-brows-provider/id1543380655>
Description: E-commerce platform for salon services where users can book services and providers can manage availability. Integrated with PayPal.
- **Smart-Haulage | Environment:** XCode 11.3, iOS SDK 13, Firebase, CocoaPods | **Description:** Allows users to request vehicle repair services anytime and anywhere with login credentials and odometer tracking.
- **Express Parking | Environment:** XCode 11.3, iOS SDK 13, CocoaPods
Description: Users can book airport parking slots and taxis worldwide.
- **Puntagram | Environment:** XCode 10.4, iOS SDK 12, Firebase, CocoaPods
Description: Messaging app to display user messages on advertisement LCD screens at malls, hospitals, and apartments, based on time and pricing selected.
- **Taxiin Driver | Environment:** XCode 10.4, iOS SDK 12, Firebase, CocoaPods, Pubnub | **URL:** <https://apps.apple.com/in/app/taxiin-driver/id1481544832>
Description: Driver app similar to Uber, allowing drivers to accept ride requests matching vehicle type.
- **Vites Driver | Environment:** XCode 10.4, iOS SDK 12, Firebase, CocoaPods, Pubnub | **URL:** <https://apps.apple.com/in/app/vites-driver/id1538754642>
Description: Driver app similar to Uber, with vehicle-type-specific ride matching.
- **Ziphawk (User & Driver) | Environment:** XCode 10.4, iOS SDK 12.4, Firebase, CocoaPods, Pubnub, Stripe
Description: Taxi booking app allowing parents to book rides for themselves or their children. Children can also book rides independently.
- **Hoobio and SquizPlay | Status:** Under development
Description: Upcoming iOS applications with interactive and gamified features (details confidential).

 EDUCATION & CREDENTIALS

- **Bachelor of Technology** in Electronics and Communication Engineering, **Dr. A.P.J. Abdul Kalam Technical University**, 2015
- **VLSI, Verilog, VHDL SOFCON**
- **Mobile App Development**, Tutor
