SUMMARY

Full Stack Developer with 1+ years of experience in building scalable web applications and RESTful APIs using Laravel, PHP, Node.js, and Shopify. Experienced in backend architecture, frontend integration, API integrations, authentication systems, Shopify integrations, and database management. Skilled in MySQL, MongoDB, PostgreSQL, TypeScript, and AWS S3.

EXPERIENCE

Laravel Developer

Dec 2024 - Dec 2025

The Knowledge Academy

- Developed scalable backend modules and REST APIs using Laravel.
- Built authentication and authorization systems.
- Used AJAX and jQuery to build dynamic, interactive frontend features.
- Managed MySQL, MongoDB, and PostgreSQL databases.

Full Stack Developer

Feb 2026 - Jun 2026

CS Consultation

- Developed backend APIs and business logic for web applications.
- Worked on database design and backend architecture.
- Worked with Shopify integrations and handled Shopify webhook events.
- Implemented API integrations and optimized workflows.
- Built and maintained frontend interfaces alongside backend services for end-to-end feature delivery.

PROJECTS

Employee Management System (EMS)

Live Project

- Developed an Employee Management System to manage employee records, attendance, and internal workflows.
- Built backend APIs and database schema using Laravel and MySQL, integrated with a responsive frontend.

Trainer Portal

Live Project

- Built a trainer management portal enabling scheduling, course assignment, and trainer performance tracking.
- Implemented role-based authentication and RESTful APIs to support real-time data updates across the platform.

Your Medicals

Live Project

- Worked on a healthcare e-commerce store built on Shopify, focused on integration work for medical product listings and services.
- Implemented Shopify app/API integrations and backend support to enable smooth store functionality and data flow.

ITIL (itil.org.uk)

Live Project

- Worked on integration and backend development for the ITIL resources website (itil.org.uk), supporting content and resource delivery features.
- Built backend modules and API integrations to streamline functionality and improve site performance.
