EDUCATION

- B.TECH
- Sri Venkateswara College of Engineering and Technology
- 2019- 2022

SKILLS

- Java
- HTML
- CSS
- Reactjs
- Spring Boot
- MVC
- Hibernate
- MySQL
- RESTful APIs
- Git
- AWS
- Agile
- Bootstrap

WORK EXPERIENCE

- Trigo Global Quality Solutions
- July 2024 - Till now
- Designation : Validation Engineer

- GLOBUS INFO SERVICES PRIVATE LIMITED
- Bangalore | Jan 2024 - Jun 2024

ABOUT ME

Motivated Java Developer with **1.5 years of hands-on experience** in developing robust web applications using Java, Spring Boot, and ReactJS. Skilled in designing RESTful APIs and deploying applications on AWS within Agile environments. Eager to contribute technical expertise and problem-solving skills to deliver scalable and efficient software solutions."

PROFESSIONAL SUMMARY

- Results-driven Java Developer with around **1.5 years of experience** in developing scalable, high-performance web and enterprise applications using **Java, Spring Boot, and Hibernate**. Front-end proficiency in creating dynamic, user-centric interfaces using **ReactJS, HTML, CSS, JavaScript, AJAX**, and **jQuery**, ensuring responsive and interactive user experiences. Strong command of **RESTful API** design and integration, enabling
- ~~seamless~~ database expertise in **MySQL**, including schema design, query optimization, and performance tuning for reliable data management.
- Cloud-competent with **AWS**, skilled in deploying and managing applications using services that enhance scalability, reliability, and cost- efficiency.
- Experienced in **Agile development environments**, contributing to sprint planning, daily stand-ups, and iterative releases to meet project milestones with high quality.
- Proficient in **Git-based version control**, ensuring streamlined collaboration, code integrity, and efficient DevOps practices across cross-functional teams.

Project Worked

Project - 2 | E-Commerce | JCPenney

July 2024 - Till now

The project involves modernizing JCPenney's e-commerce platform by developing scalable full-stack solutions using Java, Spring Boot, and ReactJS to support high-traffic operations, while optimizing performance, integrating third-party APIs, and enhancing UI responsiveness to deliver a seamless and personalized shopping experience across web and mobile devices.

Responsibilities :

- Developed and maintained full-stack features using Java, Spring Boot, and ReactJS, improving system performance and user interaction.
- Designed and consumed RESTful APIs to enable seamless integration with inventory, payment, and user management systems.
- Collaborated with UI/UX designers to implement responsive and interactive front-end components using HTML, CSS, JavaScript, and jQuery.
- Integrated MySQL for managing product data, optimizing complex queries to ensure real-time data availability.
- Deployed microservices on AWS utilizing EC2, S3 and RDS for cloud-native scalability and reliability.
- Followed Agile methodologies, actively participating in sprint planning, code reviews, and daily stand-ups to align with team goals.
- Utilized GIT for version control and performed CI/CD using Jenkins ensuring smooth and automated deployment pipelines.

Project - 1 | Healthcare | Tesco Health Insurance

Jan 2024 To June 2024

Contributed to the development of a robust digital platform for Tesco Health Insurance aimed at streamlining insurance policy management and improving customer engagement. The solution emphasized secure backend processes and interactive user interfaces for efficient access to insurance services.

Responsibilities :

- Developed scalable backend modules using Java, Spring Boot, and Hibernate for handling insurance policies, claims, and customer data.
 - Designed and implemented intuitive front-end interfaces using HTML, CSS, JavaScript, ReactJS, and AJAX, ensuring a responsive and user-centric experience.
 - Built RESTful APIs to enable seamless communication between front-end and back-end components, ensuring real-time data synchronization.
 - Utilized MySQL for efficient data storage and retrieval, with optimized queries to enhance system performance.
- Collaborated in an Agile environment, attending daily stand-ups, sprint planning, and reviews to ensure timely delivery of high-quality features.
