

Career Objective

Overall experience of 5+ years, with passion for developing Products & Enterprise Custom Applications for global customers, end-to-end with good knowledge of architecture and development skills using iOS technology. Easily adaptive to constantly changing technologies and challenges posed by evolving technologies, to suit business needs

Experience

- **Senior Software Development Engineer**

INQUIPO TECHNOLOGIES SOFTWARE (JAN 2021 - PRESENT)

Working in a module individually as well as participating with other team members based on requirements, providing mentorship and support to junior team members and help in recruiting and training of new members.

Projects

- **Digital Banking Suite (Oct 2023- Present)**

1. Developed and maintained a modular **Digital Banking SDK suite** supporting multiple customer-specific offers and features.
2. Enabled **dynamic theming and UI customisation**, allowing banks/clients to change colours, fonts, layouts, and branding without app redeployment.
3. Designed SDKs to be **plug-and-play**, ensuring easy integration across different mobile applications.
4. Implemented **configuration-driven feature toggles**, allowing offers and flows to be enabled/disabled remotely.
5. Focused on **scalability, security, and performance**, adhering to banking-grade compliance and best practices.
6. Collaborated closely with product, design, and backend teams to deliver seamless customer experiences.

- **5G Connect (April 2022 - Sept 2023)**

1. Worked on a **self-installation and onboarding flow** for multiple 5G-enabled devices, reducing dependency on on-site support.
2. Implemented **device management features**, including pairing, monitoring, and lifecycle handling.
3. Enabled **Bluetooth and Wi-Fi based device pairing** using QR code scanning for quick and secure setup.
4. Built real-time views for **signal strength, network statistics, and device health monitoring**.
5. Integrated **cloud-based performance analytics** to support diagnostics, troubleshooting, and proactive support.
6. Improved user experience by simplifying complex network setup flows into intuitive, guided steps.
