EXPERIENCE

Senior iOS Developer Netset Software Solutions

Dec 2022 - May 2026

A product company specialising in scalable mobile software solutions.

- Led iOS development across 10+ live App Store products in a 5-6 person team using Swift, UIKit and SwiftUI.
- Architected MVVM patterns that reduced inter-module dependencies and cut new developer onboarding time.
- Built WebSocket-based real-time chat and activity feeds enabling sub-second data delivery.
- Optimised API pipelines and caching strategies, reducing redundant network calls and improving load speed.
- Shipped features end-to-end from Figma spec to App Store within Agile sprint cycles.
- Improved stability by debugging crashes, profiling with Instruments, and refactoring Objective-C modules.

iOS Developer Webastral Infosystems

Dec 2020 - Dec 2022

A mobile-focused company delivering client apps across multiple domains.

- Built and shipped iOS apps in Swift/UIKit across the full lifecycle from design to App Store release.
- Integrated REST APIs for authentication and third-party services with secure token handling.
- Developed reusable UI components and utility libraries that cut duplication and sped up delivery.
- Led code reviews, established coding standards, and worked with QA to resolve bugs before release.
