Summary

Senior Software Engineer with 3+ years of experience in WordPress, WooCommerce, Shopify, and custom development. Skilled in restoring hacked sites, hardening security, and building custom plugins with OAuth, JWT, and secure data handling. Experienced in e-commerce development, API integrations, performance optimization, and responsive design. Hands-on with Laravel routing, middleware, controllers, Blade, and Eloquent. Known for clean execution, problem-solving, and delivering smooth user experiences.

Experience

MindFire Solutions

Aug 2025 - Dec 2025

Senior Software Engineer

Noida

- Restored hacked WordPress sites by removing malware, fixing vulnerabilities, and hardening servers with long-term security measures.
- Built a custom WordPress plugin using the boilerplate structure with an MVC approach, OAuth, JWT authentication, custom endpoints, and secure data handling.
- Developed a Laravel Project Management System while learning and applying routing, middleware, controllers, Blade views, Eloquent ORM, migrations, validation, authentication, and RESTful APIs.

Lightfire Solutions

Oct 2023 - Aug 2025

Wordpress Developer

- Built and maintained WordPress, WooCommerce, Shopify, and other e-commerce websites, customizing themes and plugins to enhance functionality.
- Worked closely with designers, content teams, and developers to deliver consistent, user-friendly interfaces and resolve technical issues, API integrations, and bugs.
- Improved overall user experience through responsive design, performance optimization, and site speed enhancements.

Technocrown Solutions

Oct 2022 - Sep 2023

Web Developer

- Collaborated with designers and performance team to enhance site and blog design, improving user experience.
- Designed and customized eCommerce and business service websites with WooCommerce and Elementor in WordPress.
- Managed Google Search Console and Analytics for URL indexing and on-page SEO using Yoast SEO.
