Postman
VS Code

PROFESSIONAL OVERVIEW

Software Developer with experience in designing, developing, and maintaining scalable web applications. Skilled in frontend and backend technologies, database management, and API integration. Adept at problem-solving, debugging, and delivering efficient, user-friendly solutions. Passionate about learning new technologies and improving system performance to meet business requirements

PROFESSIONAL EXPERIENCE

FULL STACK DEVELOPER

SUKALPATECHSOLUTIONS —BELGAUM,KARNATAKA

NOVEMBER-2023 – PRESENT

- Developed and maintained scalable web applications using React.js, JavaScript, HTML, CSS, Bootstrap, Node.js, Express.js, and MySQL
- Built responsive employee and admin portals with strong focus on performance, usability, and mobile-friendly design
- Developed modules for Attendance Management, including Punch In/Punch Out system, work hour tracking, real-time session monitoring, and attendance analytics
- Worked on Task Management System for assigning, tracking, and monitoring employee tasks and team progress
- Implemented Exit Flow Management for handling employee resignation processes, approvals, and workflow tracking
- Designed and developed Form Management (Formify) modules for dynamic form creation, submissions, approvals, and reporting
- Built secure Employee Login System with role-based access and authentication workflows
- Developed Admin Dashboard and Employee Dashboard with real-time insights, charts, reports, and workflow summaries
- Implemented Payslip Generation System for salary details, payroll records, and employee salary history management
- Worked on Asset Management Module for tracking employee assets, asset allocation, returns, and inventory monitoring
- Developed Vendor Management System for handling vendor details, records, approvals, and operational tracking
- Created leave management, reimbursement tracking, holiday management, and approval systems
- Integrated frontend with backend APIs and optimized API handling for smooth data flow
- Created interactive dashboards using charts and reports for employee productivity, attendance, and HR operations
- Managed backend APIs and database operations using structured architecture with routes, handlers, services, and MySQL queries
- Worked on employee onboarding and offboarding process automation for better HR operations
- Handled bug fixing, feature enhancements, and production support for existing HRMS modules
