SENIOR QA ENGINEER

Senior QA engineer with 4 years of experience leading a team of 5 QA technicians in test automation using Playwright, JavaScript and TypeScript. Developed a framework that cut test execution time by 60%, maintained web and Android test suites, and integrated automated tests into CI/CD pipelines. Oversaw manual functional, regression and UAT testing, collaborated with developers to resolve critical bugs, and mentored junior QA engineers.

SKILLS

- **Technical & Automation Skills:** Playwright, JavaScript/TypeScript, Java Selenium, Web & Mobile Test Automation, Prompt Engineering in Software Testing, API Testing (BrowserStack)
- **Testing & QA Processes:** Manual Testing, Creating/Designing/Executing Test Cases, Bug Tracking & Reporting (JIRA, ClickUp, Redmine), Test Strategy Development, Quality Assurance Process Optimization, CI/CD Integration
- **Leadership & Mentoring:** QA Team Leadership, Lead a Team of QA Technicians, Strong Communication and Collaboration Skills
- **Soft Skills:** Excellent Problem-Solving, Attention to Detail

WORK EXPERIENCE

Devkraft Technologies

Senior QA engineer

DevKraft brings digital and analytics capabilities to various enterprises to drive digital transformation.

- Wrote and executed test cases for Android and web applications using manual testing methodologies, ensuring high-quality software delivery
- Led a team of 5 QA Technicians, improving team efficiency and collaboration
- Communicated inconsistencies between system specifications and test results to development and business analyst teams, facilitating timely issue resolution
- Developed test strategies for Android and web applications, encompassing manual, functional, end-to-end, and regression testing across multiple devices to ensure robust software reliability
- Enhanced quality assurance processes by identifying and reporting defects via JIRA, streamlining feedback loops with development teams
- Was responsible for sending status reports and attending conference calls with the on-site coordinator
- Implemented a Playwright-based automation framework using JavaScript/TypeScript and integrated it into the CI/CD pipeline, reducing test execution time by 60%
- Analyzed the specifications in the User Requirements Document, Functional Specifications and Technical Requirement Documents to prepare Test plans.
- Assisted business users during user acceptance testing.
- Coordinated and conducted user acceptance training (UAT) testing with business analysts and end-field users.

EDUCATION

CT Group of Institutions

B.TECH, Computer science eng.
